You are indeed covered. Thanks.

Jim,

To verify, the Template I sent you had two cost-effectiveness calculation sheets, one with non-included attributes in, one with them out. So we're covered?

Mark

Subject: CEI Calculations

I just spoke with Jim and he confirmed that we are to use the un-included attribute contributions (i.e. SUMMIT post-processing) in computing the CEI. What is not allowed is the use of these un-included attributes in computing ridership (i.e., reflected in the model constants) and their consequential impacts on user benefits. So it is indeed as we expected and hoped. He apologizes for any confusion.
